ORGANISATIONS: CBLS Centre for Biocultural Landscape and Seascape-UNISS, SIEP-IALE IT, IALE International Association of Landscape Ecology, IALE Working Group Biocultural Landscape

APPLICATION FOR LECTURERS AND STUDENTS BY 24/9/2022 with motivation of participation and one page CV including English certification, for both lecturers and students to: gpungetti@uniss.it

INTRODUCTION TO THE WORKSHOPS

The IALE Working Group on Biocultural Landscape shares with CBLS the vision to advance research on biocultural landscape and seascape and disseminate it worldwide. They have joined efforts with SIEP-Italy to carry out three international workshops on the analysis, development and conservation of biocultural mining landscapes and seascapes.

Passing on knowledge and best practices to the young generations is an important mission shared by these organisations. They are aimed at promoting, under the umbrella of IALE International, global and interactive collaboration among students and the IALE community, and a special link between old and young generations in landscape ecology across continents.

ACTIVITIES

3 WORKSHOPS (WS) ON THE LEGACY OF BIOCULTURAL LANDSCAPE AND SEASCAPE

1. **WS1 PAST:** The legacy on **past** biocultural mining landscapes and seascapes is conveyed from international experts to the young generations divided in working groups.
2. **WS2 PRESENT:** **Present** applications of the theories explained before is demonstrated in a one-day fieldtrip in Sardinia, where lecturers and students can participate in presence at their cost.
3. **WS3 FUTURE:** The international working groups present their projects, outlining challenges for the **future** of biocultural mining landscapes and seascapes, with discussion among experts.
